Cookie Policy

What are cookies?

A cookie is a file containing an identifier (a string of letters and numbers) that is sent by a web server to a web browser and is stored by the browser. The identifier is then sent back to the server each time the browser requests a page from the server.

Cookies can be used by web servers to identity and track users as they navigate different pages on a website and identify users returning to a website.

Cookies may be either "persistent" cookies or "session" cookies.

A persistent cookie consists of a text file sent by a web server to a web browser, which will be stored by the browser and will remain valid until its set expiry date (unless deleted by the user before the expiry date).
A session cookie, on the other hand, will expire at the end of the user session, when the web browser is closed.

As well as this cookies can be first party or third party.

First party cookies are cookies that are created by the website itself.
Third party cookies are cookies that have been created by another website such as advertising or analytical website whose services are used.

Our Cookies.

We use both session cookies and persistent cookies on this website.

Session cookies are used to keep track of your details between sections of the website. Without these the website would not function correctly.

A persistent cookie is set so the website can check you have allowed cookies to be stored.

We do not allow third party cookies on this website.
